Muhammad Abeer

Full-Stack Web Developer | Laravel, PHP, WordPress, MERN

+92 312 3743890 | info@abeerkhanwebdeveloper.com | abeerkhanwebdeveloper.com

SUMMARY

Full-stack web developer with 4 years of experience, moving from frontend work to complete web applications. Builds custom Laravel and PHP applications, WordPress sites and MERN projects for e-commerce, medical, education and service businesses. Strong with REST APIs, webhooks, payment gateways, authentication, deployment, security and technical SEO. Delivered 40+ websites and applications, including long-term Laravel e-commerce platforms.

TECHNICAL SKILLS

Backend: Laravel, PHP, Node.js, Express, CRUD systems, authentication and authorization, database-driven applications

Frontend: JavaScript, HTML5, CSS3, responsive UI, custom dashboards, cross-browser compatibility

CMS: WordPress (custom themes and plugins), Elementor, Gutenberg

APIs & Integrations: REST APIs, webhooks, payment gateways, appointment booking and meeting platforms, third-party APIs

E-commerce: Product, inventory and order management, cart and checkout, customer and admin dashboards

Deployment & Security: Hosting, domains and DNS, server management, migrations, backups, CAPTCHA and bot protection, form security

SEO & Performance: Technical SEO, page speed optimization, SEO-friendly structure

Automation: Google Sheets automation, dynamic PDF generation, API-based workflows, AI-assisted development

PROFESSIONAL EXPERIENCE

Web Developer — Eximus Education

February 2026 – Present

- Built and maintain education websites and web applications in WordPress and custom code; delivered 3 major projects (2 WordPress, 1 custom-built).
- Handle integrations, troubleshooting, technical SEO, performance optimization and ongoing maintenance.
- Alongside this role, build Laravel e-commerce and web applications as a freelancer: delivered 3 projects and currently developing a long-term Laravel project.
- Implement APIs, webhooks, payment integrations, authentication, dashboards and automation.

Frontend & Backend Web Developer — Techstep Solutions

February 2024 – January 2026

- Moved from frontend to full-stack, owning custom and WordPress sites from development through deployment and maintenance.
- Built 5+ custom sites in HTML, CSS, JavaScript and PHP, including a bidding platform, 3 service websites and an e-commerce site.
- Delivered 24+ WordPress projects: 5 e-commerce, 4 medical/GFS-compliance, 3 dental, 2 salon and several service websites.
- Built PHP backend features and managed API and webhook integrations for data exchange, automation and external services.
- Handled deployment, hosting configuration, server management, backups and custom backup solutions.
- Implemented website security, bot protection and CAPTCHA; integrated third-party appointment booking and meeting platforms.
- Improved technical SEO, page performance and responsive layouts across client sites.

Frontend Developer — Elementry Solutions

January 2023 – January 2024

- Built 6 custom websites and custom dashboards with HTML, CSS and JavaScript, plus 3 WordPress websites.
- Turned design and business requirements into responsive, cross-browser interfaces and reusable UI components.
